

Beware of Ostriches

"Just because our campus is near the beach, doesn't mean we stick our head in the sand and we knew what would happen when we went Smoke-Free. We encourage our students, faculty & staff not to smoke, but if they do, we make sure that they are able to be responsible with their butt litter wherever they go to smoke by providing them with No BuTTs personal ashtrays. That way the environment is protected - and just as importantly, so is our campus's corporate profile & reputation."

Renata Di Palma, T.N.U.

If your EDU is going Smoke Free and has no plans to assist your smokers to do the right thing with their butts then you know what's going to happen too.

How many cigarette butts will your students, faculty & staff litter everyday?

Do you think it is acceptable to simply export your smokers butt litter elsewhere?

To discuss going smoke-free *the right way* or butt litter reduction for your EDU that is sustainable, effective, economical and image-positive, call us today.

Protect our environment. Protect & enhance your corporate image.
