

# Cigarette Butt Litter **Reduction** Checklist

## Unions & Employee Associations - On & Off Site

As our society has become more waste and energy conscious, Businesses, Government Depts and Organisations have made significant improvements in recycling practices, waste reduction and energy efficiency to minimize their impact on the environment.

However until recently, cigarette butt litter, the world's largest environmental litter problem, has not received the same degree of attention. Cigarette butt litter outside buildings, and scattered by the billions across our cities and countryside has increased considerably since the introduction of indoor & vehicular smoking bans, and this litter rapidly enters our storm-water and aquatic systems - poisoning our environment, degrading its beauty and taking years to break down. Every year littered butts also cause fires that damage property and kill people.

From a public image position, it doesn't get much worse for your union than your members littering their butts, especially when out on-site, in union gear, uniform, safety vest, hard-hat, or in their vehicle with your union sticker on the back, etc. It's even worse when they're assembled in numbers, like at a rally, union meeting, or even manning a picket line.

What your members do does impact on your organisation's public profile. Your smoking members are the only ones who can actually reduce the problem of affiliated butt litter, but they can use a little help to do it. This is another great example of how unions can - and should lead the way for their members - and help protect our environment, and their public image at the same time.

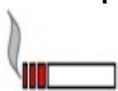

Butt Litter Responsibility provides the means for responsible Union Management to assess their efforts to provide adequate education and disposal infrastructure in order to reduce the cigarette butt litter emanating from their members and organisation's activities, whilst simultaneously promoting the highest standards of environmentally and socially responsible behaviour.
