

Cigarette Butt Litter **Reduction** Checklist

EDUs - University, College & Campus Facilities

As our society has become more waste and energy conscious, Businesses, Councils and Organizations have made significant improvements in recycling practices, waste reduction and energy efficiency to minimize their impact on the environment.

However, until recently, cigarette butt litter, the world's largest environmental litter problem, has not received the same degree of attention. Cigarette butt litter outside buildings, and scattered by the billions across our cities and countryside has increased considerably since the introduction of indoor & vehicular smoking bans, and this litter rapidly enters our storm-water and aquatic systems - poisoning our environment, degrading its beauty and taking years to break down.

Cigarette butt litter at educational facilities is primarily created by students, faculty & staff and also by visitors. They're the only ones who can actually reduce the problem of litter, but they need help to do it.

Butt Litter Reduction at EDUs is even more critical as more EDUs around the world go **Smoke Free**. Simply exporting your smokers butt litter off your premises is unacceptable.

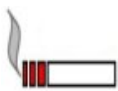

Butt Litter Responsibility provides the means for responsible campus Managers and Officers to assess their efforts to provide adequate education and disposal infrastructure in order to reduce the cigarette butt litter emanating from their campus's activities.
