

# Our ashtrays make a heap of difference.

Is it 'a breeze' emptying your ashtray?

Outdoor and curbside eating has become a customer favourite, but one puff of wind can leave your diners fuming with irritation, or worse, ashen faced - and your property and surrounding area littered with cigarette butts, ash & embers. But it need not be.

By providing your patrons with our windproof ashtrays, everybody can carry on as normal without stray butts being carried on the wind and ending up littering the front of your business and polluting the environment.

No Butts windproof ashtrays enclose dirty used butts in a sealed chamber and the ash, embers and odours are trapped inside. Completely. So you never need worry about your customers getting up each other noses again - or up your nose either! Sugar stalks and matches, etc. are also taken care of as they are easily contained.

Councils across Australia are increasingly concerned about the problem of cigarette butt litter caused by curbside & footpath tables, and they are coming down hard on businesses that don't or won't accept responsibility for the actions of their own customers at their own curbside tables. In fact over 250 councils now require a windproof ashtray on every outside table to gain or maintain footpath trading permits. The problem may be prolific. The solution is simple!

Using windproof ashtrays not only helps the environment and your local community - it also benefits business owners and operators, your neighbours, your staff and your customers, whether they smoke or not. Everybody wins.

Our windproof and wall-mounted ashtrays come in a wide range of sizes and styles, and all our products are rust proof and manufactured from **100% stainless steel** - and they don't need frequent emptying so your staff can concentrate on more important duties - like delivering excellent customer service.

As a bonus, when logo printed our windproof ashtrays also advertise your business, set an excellent example, and create a very positive perception. In fact many of our customers do a roaring trade by selling our windproof ashtrays with their logo on them to interested customers. Just ask any of our 4,500+ cafes, restaurants, bar and hotel/motel customers.

After all, they're your customers sitting at your tables. So by simply providing your patrons with our windproof ashtrays, you'll prevent yourself from falling foul of both the law and the layperson. No Butts windproof ashtrays eliminate your customers cigarette butt litter at your outside tables - and protect your property and your corporate image. That's good for all and great for the environment as well. No Butts about it.
