

Attention Smokers

The butts **stop** here.

How to save the planet from cigarette butt litter:
(4 easy steps to using your Personal Ashtray!)

(Wherever you go, wherever you smoke)

1. **Pop** it open!
2. **Drop** butt in!
3. **Snap** it closed!
4. **Shake** it for a few seconds!

When full of butts just empty them into a trash bin and re-use!
How easy is that! The environment loves you!

You do not need to butt out your cigarette before insertion
(ashtray may get a little warm for a few seconds but is melt-proof)

Your Personal Ashtray can be rinsed out or washed when needed
(simply rinse under warm water and allow to dry)

If or when it's time to retire your Personal Ashtray, empty butts
into trash and place used Personal Ashtray into recycle bin

Protect our environment.

Don't be an Ash-hole! The environment loves you.

...because the world
is not an ashtray.
